

MGC CAMERAS

Protect Your Assets from False Claims

► What statistics prove the benefits of dashcams?

The 2011 NOPUS shows that at any given daylight moment across America, approximately **660,000** drivers are distracted by using cell phones or electronic devices. To reduce the chance of false claims due to passenger distractions, the use of dashcams is vital for fleet companies.

There is an **86%** decrease in accident-related costs when dashcams are used (HHS, 2017).

There is a **52%** reduction of safety related events because of driver coaching (NSTSCE, 2015). Dashcams are an excellent tool to use for driver coaching.

► How many hours can the MGC Dash Cam record?

The Dual View Dashcam can record about 200 hours with medium quality at 5 frames per second. Hours vary depending on SD card sizes and recording settings.

► Are there any Monthly fees?

No, there is no recurring fees such as monthly, annual, or licensing.

Notes:

HD cameras are only compatible with HD monitors. It is recommended for users to replace SD memory cards at least once a year in order to prevent important footage loss.
