

Pairing Instructions

Once the monitor and camera are connected to power, they should automatically pair. If they do not connect automatically, please follow the instructions below:

Step-by-Step Instructions

- 1.Connect Power:** Connect the monitor and camera to their respective power sources.
- 2.Enter Pairing Mode:** On the monitor, press the “Menu” button to access the settings menu and select the “Pairing Mode” option by pressing the “Enter” button.
- 3.Initiate Pairing:** The monitor will search for the camera signal. The pairing process should complete within a few seconds.
- 4.Pair Additional Cameras:** To pair another wireless camera with the monitor, unplug any currently paired camera. Repeat steps 1 through 3 to pair.

Troubleshooting Tips

- No Signal:** Ensure both the camera and monitor are properly powered. Re-check all connections.
- Interference:** Keep the camera and monitor away from other wireless devices to avoid signal interference.
- Re-pairing:** If the initial pairing fails, repeat the steps from the beginning.
